The Book of the Game is a narrative work and I was able to link the stories in the game with the characters and the situations in the book. I have revised and edited the text that I used in the book version of the game and added a new story. The Book of the Game has a large vocabulary of characters to create the background of the stories. One of the characters' name was created to appear in the book and some of the words were created to be suitable for the game. The visuals of the game and the character designs were completed based on the stories of The Book of the Game. However, the sounds of the game were created based on the stories of the game. Some of the songs were created and some of them were remade. The Book of the Game has been organized into chapters and it has a prologue and an epilogue. A few parts of the story have been left open to meet the needs of the gameplay. The game has a large set of objectives. The Book of the Game has a variety of characters. Some characters appear in the book version, and some characters appear only in the game. A few characters from the book have been expanded so that they can fit more the gameplay needs.
